

Global schedule reliability dropped back to January 2024 levels

Sea-Intelligence has published issue 153 of the *Global Liner Performance (GLP) report*, with schedule reliability figures up to and including April 2024. As the report itself is quite comprehensive and covers schedule reliability across 34 different trade lanes and 60+ carriers, this press release will only cover the global highlights from the full report.

Schedule reliability reversed its improving trend and declined by -2.5 percentage points M/M in April 2024. This figure is now only 0.6 percentage points higher than the lowest YTD point of January 2024. On a Y/Y level, schedule reliability in April 2024 was -12.1 percentage points lower. However, the average delay for LATE vessel arrivals improved by -0.31 days M/M to 4.74 days. This figure is now closer to the pre-pandemic lows than the pandemic highs. On a Y/Y level, the April 2024 figure was 0.40 days higher.

Wan Hai was the most reliable top-13 carrier in April 2024 with schedule reliability of 59.0%. Evergreen followed with schedule reliability of 53.2%. There were another 4 carriers above the 50% mark. ZIM was the least reliable carrier with schedule reliability of 44.2%. Only CMA CGM and Evergreen were able to record a M/M improvement in schedule reliability in April 2024, with both of 1.3 percentage points each. ZIM recorded the largest decline of -11.9 percentage points. On a Y/Y level, none of the 13 carriers recorded an increase in schedule reliability, with PIL recording the largest decline of -21.8 percentage points. There were 6 more carriers with double-digit declines.
